In the Claims:

- 1. (currently amended) A conformable skin element system comprising one or more conformable skin elements, <u>each skin</u> <u>element forming a pressure transducer and flow modifier</u>, a controller, connections for coupling the conformable skin elements and the controller, a feedback control loop for generating and transmitting signals between the skin elements, the controller and the connections for conforming the skin elements to desired deformations.
 - 2-7. (original).
 - 8-14. (withdrawn).
 - 15. (original).
 - 16. (withdrawn).
 - 17-35. (original).
- 36. (currently amended) The apparatus of claim 31, further comprising wires communicating with the skin elements, the feedback loop, and the micro-controller for conducting voltage to the skin elements and for transmitting pressure signals from the skin element via the feedback loop to the micro-processor.
- 37. (currently amended) The apparatus of claim 31, further comprising mounts on the surface for mounting the skin elements.
 - 38-39. (withdrawn).
 - 40-47. (original).
